Problem Statement

Making professional attractive and customized resumes is a major difficulty for job searchers in today's competitive employment market. Many people don't have the time resources or creative skills to create resumes that properly highlight their experiences and skills. Common resume building techniques frequently produce general out-of-date or badly structured documents that don't grab hiring managers' attention. Also, it can be difficult and confusing to manage several resumes for various job applications which can result in dissatisfaction and lost opportunities.

Current alternatives such expensive resume writing services or simple word processors are either very expensive or don't offer the flexibility and personalization required to meet a range of employment goals. Because of this market gap job seekers find it difficult to showcase themselves in the best possible way, which ultimately affects their chances of landing their desired roles.
